Facts on the Safety Identification Systems

Escape and Rescue Plans for workers and visitors

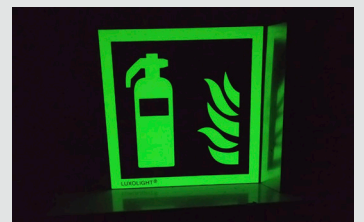

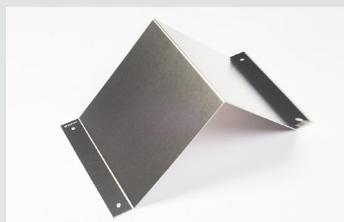

- Individually drawn and tailor-made with important components such as escape routes, fire extinguishers, wall hydrants, first aid kits, etc. – providing quick orientation and enhanced safety in buildings
- Robust high quality laminations and perfect visibility thanks to the original photoluminescent Luxolight® materials
- Available with fitting premium quality anodized aluminium Snap Frames in aesthetically pleasing design

Safety, Escape Route and Fire Fighting Signs

- Ultra-durable materials and highly resistant prints ensure long lifespan even in chemically affected areas
- Large number of available installation components and useful accessories
- Internationally harmonized sign layouts with globally comprehensible symbols and safety colours
- All signs come in various sizes and as normal printed version or in original Luxolight® photoluminescent (“afterglow”) quality

The choice is all yours.

Our Sales Experts offer deep consultation on the many possibilities of the highly versatile Safety Identification Systems while our experienced Technical Team ensures failsafe installation of our quality products.
